SUMMARY

Backend-focused CS undergraduate at VIT Vellore (CGPA 8.37) building full-stack systems with Spring Boot, React, and Go. Built and deployed an AI-powered mock interview platform with ATS resume scoring and Gemini API integration. Seeking a technical internship to apply backend and system-design skills in a product environment.

EDUCATION

Vellore Institute of Technology

Vellore, India

B.Tech in Computer Science & Engineering — CGPA: 8.37

Aug 2023 – Jul 2027

- Coursework: OOP, Data Structures & Algorithms, Operating Systems, Computer Networking, DBMS

PROJECTS

AI Mock Interview Platform

Apr 2026 - Present

Spring Boot · React · Gemini API · MySQL | GitHub · Live

- Deployed and live as of Jun 2026 — frontend on Vercel, backend on Railway.
- Built and deployed a full-stack AI interview tool with PDF resume upload, ATS scoring against job descriptions, and Gemini-powered question generation (5 role-specific questions, 90-second timer each) with typed/speech-to-text responses and ML-driven feedback.
- Designed and validated REST APIs for role selection, question generation, answer submission, and feedback using Postman; wrote comprehensive API documentation for all endpoints.
- Persisted interview sessions, responses, scores, and feedback in MySQL enabling session history retrieval.

Subscription Manager

Mar 2026 – Present

Spring Boot · React · JWT · MySQL | GitHub

- Built a full-stack subscription management system with REST APIs for CRUD operations, cost tracking, and billing cycle management.
- Implemented JWT authentication with refresh-token rotation and integrated email/push renewal reminders.

Hot Reload CLI Tool

Feb 2026

Go · fsnotify · CLI Development | GitHub

- Built a Go CLI tool using fsnotify that watches the filesystem and auto-rebuilds/restarts apps on save, eliminating manual restarts.
- Debugged edge-case file-watch events (rapid saves, renames) and validated behavior using a live demo HTTP server.

TECHNICAL SKILLS

Languages: Java, Python, C++, Go, JavaScript, SQL, C, HTML, CSS

Frameworks & Databases: Spring Boot, React, MySQL

Tools: Git, GitHub, Postman, JUnit, IntelliJ IDEA, VSCode

Cloud: AWS EC2, S3, IAM

Concepts: REST APIs · JWT Auth · OOP · DSA · OS · DBMS · Unit Testing · Software Development Lifecycle · Code Review · Version Control · Technical Documentation · Debugging and Troubleshooting

ACHIEVEMENTS & PROFILES

LeetCode: 100+ problems solved (arrays, strings, linked lists, trees, DP) | leetcode.com/u/suhanee11

HackerRank: SQL (3-star) · Java (2-star) · Python (2-star) badges

Deloitte Data Analytics Simulation: Data analysis, forensic tech, Tableau dashboard creation (Forage, Feb 2026)

AWS Skill Builder: Completed hands-on labs on EC2, S3, and IAM

ACTIVITIES & INVOLVEMENT

McKinsey Forward Program

Jan 2026 – Present

Participant — Leadership & Problem Solving Track

- Completed modules on adaptability, structured problem solving, and leadership; applied frameworks to a real-world case assignment.

GirlScript Summer of Code (GSSoC)

May 2026 – Present

Open Source Contributor

- Contributing via pull requests and code reviews to open-source repositories.

Junior Core Member – E-Cell, VIT Vellore

Jan 2024 – Jul 2024

UI/UX Ideathon (Top 10)

- Coordinated logistics for E-Summit 2024 (500+ participants); designed a Figma pet-care prototype, Top 10 at Yantra Tech Fest Ideathon.
